

Dear Students and Parents:

North Kirkwood Middle is committed to providing our students with the knowledge, skills, and perseverance they need to succeed – both inside and outside the classroom. As part of this commitment, we are asking all incoming 6th grade students to participate in a digital summer learning program called Summer Slugger. Students should register using the information in this packet.

Summer Slugger allows students to build and maintain math and literacy skills through digital, baseball-themed games. Summer Slugger makes learning fun by incorporating points and progress-based rewards for accomplishments, so students are prepared to enter the next school year on track. **All students who complete the program will receive 2 FREE baseball tickets.**

Game topics include:

- Spelling, grammar, comprehension, vocabulary, phonemic awareness
- Arithmetic, geometry, units of measurement, place value, equivalency

Research has shown that parent involvement is key for motivating students to fully take advantage of learning opportunities during the summer months. To help your child stay on track with Summer Slugger, we are asking that you check in on your child's update regularly.

If you have any questions, please email Sarah Boyd at sarah.boyd@kirkwoodschoools.org.

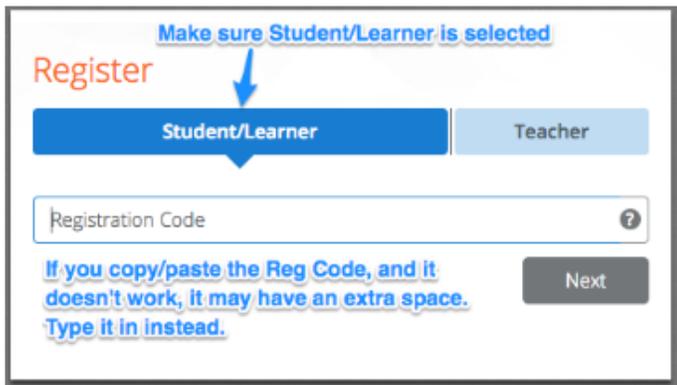

We hope that you will join us in our efforts to combat summer learning loss and help our students get ahead for the next school year!

Regards,

NKMS Sixth Grade Teachers

Student Registration Guide

- 1) Go to www.everfi.com/register, and enter the registration code - 81cd14ec

Make sure Student/Learner is selected

Register

Summer Slugger Parent Guide

What is Summer Slide?

Each summer, students lose critical math and literacy skills, widening the achievement gap and requiring substantial remediation at the start of each school year.

- ❖ 2.6 months of math skills are lost over the summer on average
- ❖ 6 weeks are spent re-learning old material each fall
- ❖ 75% of U.S. students currently do not participate in summer learning programs

How can Summer Slugger help?

Summer Slugger is a digital learning program designed to prevent the “summer slide,” offering students engaging activities focused on math and literacy. Thanks to the support of Major League Baseball, students can play and learn through fun, baseball themed games throughout the summer. The personalized paths in Summer Slugger allow students to stay challenged while they maintain and improve their skills. The course contains 36 “Series,” with each Series containing one Math and one Literacy game, designed to take no longer than 10 minutes each.

How does my child access Summer Slugger?

Each student created a Summer Slugger username and password with their teacher, which they will use to login to the program. The games are all online, and can be access on a tablet, smartphone or computer. The URL for your child to access the program is: everfi.com/login.

What do I do if my child has forgotten their username and/or password?

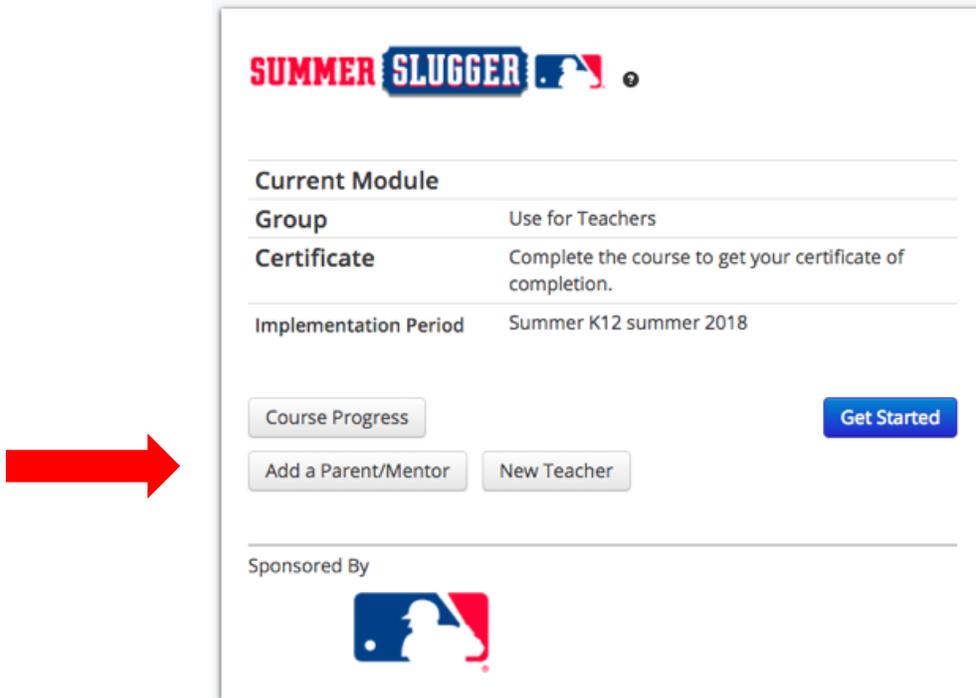

If your child has forgotten their username and/or password, please email summerslugger@everfi.com and include the following information:

- Student first and last name
- School name and state/province of the school
- NKMS Program Director name (Sarah Boyd)

What is the role of a parent/guardian in Summer Slugger?

Because Summer Slugger is intended to be utilized over the summer months, parents/guardians are critical in helping students be successful in the program. Parents/guardians should:

- Add their email address to their child's Summer Slugger user account. This will allow you to receive regular updates on your child's progress in the program. Additionally, if your local MLB team is offering any ticket incentives to kids for completion of Summer Slugger, this will be communicated to parents/guardians through this contact information.
 - To do this, have your child login to their Summer Slugger account (everfi.com/login). On the main page of their account, you will see a button to **Add Parent/Mentor**

- Have weekly check ins with your child to see how they're doing and what they've learned. Work with them to complete the Summer Slugger game log (see Appendix A).

Summer Slugger Log

Fill in the date next to game when you play it! It is recommended that you complete 2 series each week throughout the summer. Aim to complete all series by September 1st!

Name: _____

Series	Literacy Game	Math Game	Date	Series	Literacy Game	Math Game	Date
1	Word Catcher	Number Zone		2	Major League Memory	Math Catcher
